Education

Bachelor of Computer Applications(BCA) - 2022
University of Science & Technology, Meghalaya, India

Profile

Worked on Database Management Systems and Game Developments.

Projects

Hostel Management System
An offline windows application for institutes that manages the allocation and deallocation of rooms for students and employees of an institute
Features includes: ADMINISTRATOR MODE only , Login Screen, Add/Remove Edit student or employee details, Manage Rooms, Update payment for a room , Check overall records
Link: https://github.com/AtarioPZ/Hostel-management

Mini Game Project
Developed as a personal project with various game mechanics in Unity. The Player needs to collect all the coins presented on the map to get an item which will lead him to the next area.
